THE PATENTED HAAGA SWEEPING MACHINE

haaga

S W E E P S I T A L L

THE RIGHT ONE FOR ANY PURPOSE

Haaga can deliver the suitable sweeping machines for every purpose, for both private and commercial use. Haaga can sweep small and large areas and removes fine and coarse trash as well as dry or wet material easily, cleanly and effectively. We would be happy to advise you as to the selection of the sweeping machine most convenient for your purpose.

ACCESSORIES

Lubricant
Lubricates, protects, cleans.

Trash grab
for paper, waste, cans etc.

Sweeping set
sweeping without backpack

TOPSWEEP 55

Circular broom sweeping machine for street dirt, wet and dry leaves and coarse material. Light design, easy to handle - suitable for smaller areas.

Working principle:
Circular broom direct system
Sweeping width: 55 cm
Sweeping capacity: 1.600m²/h
Weight: 6 kg
Container capacity: 25 l

TOPSWEEP 75

Circular broom sweeping machine for street dirt, wet and dry leaves, coarse material. For larger areas, light and easy to handle

Working principle:
Circular broom direct system
Sweeping width: 75 cm
Sweeping capacity: 2.400 m²/h
Weight: 9 kg
Container capacity: 47 l

TURBO 770

Turbo sweeping system for double cleanliness with circular brooms and sweeping roll. Sweeps-up everything from fine sand to empty cans.

Working principle:
TURBO-sweeping system.
Sweeping width: 77 cm
Sweeping capacity: 2.860 m²/h
Weight: 12 kg
Container capacity: 50 l

TURBO 970

Turbo sweeping system for double cleanliness with circular brooms and sweeping roll. With a sweeping width of 97 cm - suitable for large areas.

Working principle:
TURBO-sweeping system
Sweeping width: 97 cm
Sweeping capacity: 3.600 m²/h
Weight: 13 kg
Container capacity: 50 l

TURBO 970 ACCU

Turbo sweeping system with electric drive for the perfect cleaning of large areas with motorized brush and driving mechanism.

Working principle:
Accu TURBO-sweeping system
Sweeping width: 97 cm
Sweeping capacity: 4.100 m²/h
Weight: 19 kg
Container capacity: 50 l.
Battery: 12V lead battery 12 AH
Running time: 1 hour

Sweeps wet and dry leaves and other refuse

4 year wear and tear warranty for the brushes

Central brush regulation for raising and lowering

Protruding brushes on both sides

THE PATENT OF THE ROTATING CIRCULAR BROOMS

Contrary to the usual roller sweeping machines, the special Haaga circular brooms suck in the dirt already in front of the machine. No disturbing front wheel, rubber lip or deep-seated waste container hinder the dirt intake. The circular brooms cut the waste material away from the street and suck it directly into the container.

All kind of materials, even wet and dry leaves, stones, flat or large materials will be whisked into the machine.

With the protruding circular brooms, you can sweep directly along walls. A further advantage is the variable sweeping pressure of the circular brooms and the sweeping roll with the push of one button. And all this is especially easy to handle, quiet and uncomplicated.

The easily removable latched container can be taken off, emptied and refastened with a sweep of the hand. For the professional sweepers, we have developed the TURBO sweeping system that sweeps more effectively using an additional sweeping roll in front of the waste container.

The Circular Broom System

A clever idea ! The two in opposite directions rotating circular brooms grab the material directly in front of the machine and whisk it into the container positioned directly behind the brooms. The machine does not simply drive over the material and push it away.

The Haaga TURBO sweeping system

The patented Haaga Turbo Sweeping system sweeps twice with one manoeuvre. First, the two circular brooms cut the material away from the street and then the sweeping roll in the back of the machine additionally takes in the fine dirt and transports it into the waste container.

THE MACHINE FOR YOUR HOME - TOPSWEEP 55

LADIES WE WILL SWEEP YOU OFF YOUR FEET

With TopSweep 55 you can clean your driveway, court-yard, sidewalk, garage, terrace etc. quickly, thoroughly and with minimal energy. The handy

TopSweep 55 with the special Haaga circular brooms sweeps up all dirt from the road, wet and dry leaves, stones, cigarette-stubs, coarse trash etc. The wear-resistant belt-free direct drive ensures easy motion and a long service life. Protruding circular brushes and a continuous sweeping pressure adjustment ensure optimal cleanliness even in those hard to reach corners and edges. The TopSweep 55 can be placed or suspended compactly in storage in order to save space. With a weight of only 6 kg the TopSweep 55 can be easily transported.

TopSweep 55
The sweeping machine for your home. Cleans an area of 3 soccer fields per hour (=1.600 sm/h). With a 4 year wear and tear warranty on the brushes.

Technical data of TopSweep 55: Working principle: circular broom direct system, sweeping width: 55 cm, sweeping capacity: 1600 m²/h, weight: 6 kg, container volume: 25 l

Sweeps wet and dry leaves and other refuse

4 year wear and tear warranty for the brushes

Central brush regulation for raising and lowering

Protruding brushes on both sides

THE SWEEPING MACHINE FOR LARGE AREAS - TOPSWEEP 75

LEAVE THE YARD WORK TO US

With TopSweep 75 you can clean larger areas quickly, thoroughly and with minimal energy.

The handy machine with the special Haaga circular brooms

sweeps up all dirt from the road, wet and dry leaves, stones,

cigarette-stubs, coarse trash etc. The wear-resistant belt-free direct drive ensures easy motion and a long service life. Protruding circular brushes and a continuous sweeping pressure adjustment ensure optimal cleanliness even in those hard to reach corners and edges.

The TopSweep 75 can be placed or suspended compactly in storage in order to save space.

TopSweep 75
The sweeping machine for your home. Cleans an area of 4 soccer fields per hour (=2.400 sm/h). With a 4 year wear and tear warranty on the brushes.

Technical data of TopSweep 75: Working principle: circular broom direct system,

sweeping width: 75 cm, sweeping capacity: 2.400 m²/h, weight: 9 kg, container volume: 47 l

Sweeps wet and dry leaves and other refuse

4 year wear and tear warranty for the brushes

Central brush regulation for raising and lowering

Protruding brushes on both sides

TURBO 770 - THE SWEEPING MACHINE FOR HIGHEST DEMANDS

UNDER EVERY PILE OF DIRT HIDES A CLEAN GROUND

The patented Haaga Turbo sweeping system sweeps twice with one manoeuvre using circular brooms and additional sweeping roll.

Everything - from fine sand, street dirt, wet and dry leaves, stones, cigarette-stubs, up to even cans - can be whisked away. Yards, sidewalks, halls, machine shops, or storage houses can be quickly cleaned with minimal energy. The 4-fold wear-resistant, beltless direct drive and dust-protected ball bearings ensure easy manoeuvre and a long service life. Protruding circular brushes and a variable sweeping pressure adjustment ensure maximal cleanliness even in those hard to reach corners and edges. Optimal container filling is obtained thanks to the overhead sweeping roll. The TURBO 770 can be placed or suspended compactly in storage in order to save space.

The Turbo 770
The sweeping machine for the professional. Cleans an area of 5 soccer fields per hour ($\approx 2.800 \text{ m}^2/\text{h}$). With a 4 year wear and tear warranty on the brushes.

Technical data of TURBO 770: Working principle: Turbo sweeping system, sweeping width: 77 cm, sweeping capacity: $2.860 \text{ m}^2/\text{h}$, weight: 12 kg, container volume: 50 l

Sweeps wet and dry leaves and other refuse

4 year wear and tear warranty for the brushes

Central brush regulation for raising and lowering

Protruding brushes on both sides

FOR REAL MEN WE RECOMMEND THE TURBO 970 TEST DRIVE

The patented Haaga Turbo sweeping system sweeps twice with one manoeuvre using circular brooms and additional sweeping roll. Everything - from fine sand, street dirt, wet and dry leaves, stones, cigarette-stubs, up to even cans - can be whisked away. With a sweeping width of 97cm, the TURBO 970 is ideal for large yards, sidewalks, halls, machine shops, or storage houses. The 4-fold wear-resistant, beltless direct drive and dust-protected ball bearings ensure easy manoeuvre and a long service life. Protruding circular brushes and a variable sweeping pressure adjustment ensure maximal cleanliness even in those hard to reach corners and edges. Optimal container filling is obtained thanks to the overhead sweeping roll. The TURBO 970 can be placed or suspended compactly in storage in order to save space.

The Turbo 970
The sweeping machine for the professional. Cleans an area of 6 soccer fields per hour (=3.600 sm/h). With a 4 year wear and tear warranty on the brushes.

Technical data of TURBO 970: Working principle: TURBO sweeping system, sweeping width: 97 cm, sweeping capacity: 3.600 m²/h, weight: 13 kg, container volume: 50 l

Sweeps wet and dry leaves and other refuse

4 year wear and tear warranty for the brushes

Central brush regulation for raising and lowering

Protruding brushes on both sides

HAAGA ACCU AND THE YARD PRAC- TICALLY CLEANS ITSELF

The Turbo 970 Accu is the only sweeping machine with motorized and manual operation. The Turbo 970 Accu is always ready for use even without battery operation.

The patented Haaga Turbo sweeping system sweeps twice with one manoeuvre using circular brooms and additional sweeping roll. Everything – from fine sand, street dirt, wet and dry leaves, stones, cigarette-stubs, up to even cans – can be whisked away. With the continually rotating brooms and a sweeping width of 97cm, the TURBO 970 Accu is ideal for large yards, sidewalks, halls, machine shops, or storage houses. Protruding circular brushes and a variable sweeping pressure adjustment ensure maximal cleanliness even in those hard to reach corners and edges. Optimal container filling is obtained thanks to the overhead sweeping roll.

Turbo 970 Accu
The sweeping machine for the professional. Cleans an area of 7 soccer fields per hour (=4.100 sm/h). With a 4 year wear and tear warranty on the brushes.

Technical data of Turbo 970 Accu: Working principle: Accu TURBO sweeping system, sweeping width: 97 cm, sweeping capacity: 4.100 m²/h, weight: 19 kg, container volume: 50 l, battery: 12V lead battery, battery life per charge: approx. 1 hour, external charging unit with charge conservation

Sweeps wet and dry leaves and other refuse

4 year wear and tear warranty for the brushes

Central brush regulation for raising and lowering

Protruding brushes on both sides
